

STEAM BLASTING SERVICES

The added effect of hot water, or steam is essential for several reasons. It can effectively clean contaminants from surfaces such as grease, oil or baked-on residue. It can also be a natural disinfectant of spores, bacterial mold, and organic media overgrowth. These services can be rendered to plant facilities, sensitive equipment and buildings.

DRY ICE BLASTING SERVICES

Dry ice blasting (CO₂) is non-toxic, non-conductive and a cost productive option that eliminates many of the harsh factors associated with cleaning. TEAM Group performs with the customer in mind. Schedule a simple or high performance cleaning and enjoy 24/7 emergency support during off peak hours. Services include high level access cleaning.

ABRASIVE BLASTING SERVICES

We enhance resurfacing and special project needs. Media varies by the task, with selections including soda, sand, calcium, and nut. TEAM will meet your surfaces cleaning requirements, dispatching single or specialty teams with the blasting grit to get it done. We service building structures, pipes, machinery, water towers, silos and more.

REMEDIATION SERVICES

TEAM Group Projects Division can maintain and restore industrial, commercial and residential buildings and elemental structures for re-entry. We tackle asbestos, mould, and lead. Services include:

- ceilings and floors
- roofs and attics

INDUSTRIAL CLEANING

- basements and decks
- pipes
- outside walls

WASTE MANAGEMENT

TEAM Group offers safe transportation and disposal of non-hazardous and hazardous waste materials ranging from solids to liquids. We're proudly licensed for waste hauling and removal! Some services include:

- universal recyclables
- trash services to water, oil, oily debris and used oil, paint sludge
- case by case construction, industrial, and e-waste
