

PRODUCTION AID TOOL MANAGEMENT

With production aid tools, racks, hangers or jigs here are some of the services we provide with our cleaning process:

- Verify tooling meets plant schedule production requirements
- Inventory by part
- Establish a frequency of cleaning of tooling
- Tracking of damage or defects
- Quarantine damaged tools
- Track % tooling repaired or restored per year
- Track % tooling scrapped per year
- Track % tooling purchased per year
- Track and chart scheduled tasks vs completed tasks per cleaning scope
- Clean and inspect all returnable dunnage

CHEMICALS & EQUIPMENT MANAGEMENT

As a full service industrial cleaning provider, TEAM Group ensures the cleanliness of the facility is maintained up to standard with good housekeeping of consumables, supplies and equipment. These elements are approved in the paint shop and designed to meet local safety requirements, including being ecologically friendly and gentle on surfaces.

EMERGENCY RESPONSE

TEAM Group provides emergency coverage 24/7, including holidays for ordering, expediting, follow up, scheduling, delivery, troubleshooting and technical support. When it comes to vendors, material handling and conformance testing, defect analysis, field coordination and supervision, spill response, flood control and blood pathogen cleanup—we're available for you.
